

GYNAECOLOGY AUDIT FORM – HKCOG 2014

Name:	<i>(initials)</i>
Age:	
ID No.	()
	<i>(at least 5 digits)</i>

Hospital :	
Form No.	

Date of Admission: _____ **Date of Discharge:** _____

Admission Status : Routine / Emergency / Day case/ Transfer in / Unplanned readmission (within 28 days of last admission)

Discharge Status : Home / Transfer for convalescence / Transfer (referral) / DAMA / Death

DIAGNOSIS (in code) _____

TREATMENT (in code) _____

For ONCOLOGY cases

Old case / New case **Stage of Disease :** Recurrent / Unstaged / Stage I / Stage II / Stage III / Stage IV

For Intra-abdominal Operation ONLY (circle as appropriate)

Date of operation: _____ **Elective / Emergency / Unplanned re-operation**

Operating time (min): _____ **Estimated Blood loss (ml)** _____

Primary approach by intention for intra-abdominal procedure : Laparotomy / Laparoscopic / Robotic

Conversion to other route : No / Laparotomy / Laparoscopy

Primary trocar entry : Not relevant / Close / Open / Direct trocar entry / Visual guided trocar entry

Laparotomy incision : Not relevant / Suprapubic transverse / Midline / Para-median

Pathology: Benign / Pre-malignant / Borderline malignant / In-situ carcinoma / Malignant (*the worse pathology*)

Uterine size: Normal / ≤ 8 weeks / 10-12 weeks / 14-16 weeks / 18-20 weeks / > 20-24 weeks / > 24 weeks

For myomectomy: Number of fibroids removed _____ **Largest fibroid size:** _____ cm

Largest fibroid type: Pedunculated/ Subserosal/ Intramural/ Submucosal

Largest fibroid location: Anterior / Posterior / Fundal / Broad ligament / Anterior Cervical / Posterior Cervical

Right ovarian cyst/tumour: No / Yes **Size:** ≤ 5 cm / 6-10 cm / 11-15 cm / > 15 cm **Ovary removed:** No / Yes

Left ovarian cyst/tumour: No / Yes **Size:** ≤ 5 cm / 6-10 cm / 11-15 cm / > 15 cm **Ovary removed:** No / Yes

Ectopic pregnancy site: Tubal/Fimbrial/Ampullary/Isthmus/Interstitial/Cornual/ Ovarian/Abdominal/Cervical/ Caesarean scar

Adnexal adhesion grade: Right: 0 / 1/ 2/ 3 **Left :** 0/ 1/ 2/ 3

POD adhesion grade: 0 / 1/ 2/ 3 **Obliteration:** None / <50% / ≥ 50% / 100%

Grade : 0 - none; 1 - filmy, avascular;
2 - dense and/or vascular; 3 - cohesive

COMPLICATIONS

Intra-operative/procedural

1. Bladder injury
2. Ureteric injury
3. Bowel injury
4. Perforation of uterus
5. Major vascular injury
6. Inferior epigastric artery injury
7. Surgical emphysema
8. Fluid overload
9. Haemorrhage requiring transfusion
10. Cardiopulmonary arrest
11. Anaesthetic complications (Specify): _____
12. Others (Specify): _____

Post-operative/procedural

1. Fever >38°C after first 24 hours (readings at least 4 hours apart)
2. Bowel injury/ fistula
3. Bladder injury/ fistula
4. Ureteric injury/ fistula
5. Chest infection
6. Urinary tract infection (requiring antibiotics)
7. Wound complications (Dehiscence, haematoma, ecchymyosis)
8. Pelvic hematoma/abscess
9. Postoperative haemorrhage requiring re-operation or transfusion
10. Deep vein thrombosis
11. Pulmonary embolism
12. Cardiopulmonary arrest
13. Cerebro-vascular accident
14. Unplanned re-operation before discharge (specify): _____

In case of death, main cause(s):

14. Re-admission within 28 days of surgery (specify): _____

16. Others (specify): _____
