

GYNAECOLOGY AUDIT FORM – 2024

(initials)

Name: _____

Age: _____

ID No. _____ ()
(at least 5 digits)

Hospital : _____

Form No : _____

Date of Admission:

Date of Discharge:

Status at Admission

- (1) Transfer in
- (2) Emergency
- (3) Routine
- (4) Unplanned readmission (within 28 days of last admission)
- (5) Day case

Status at Discharge

- (1) Home
- (2) Transfer for convalescence
- (3) Transfer (referral)
- (4) DAMA
- (5) Death

DIAGNOSIS (in code) _____

TREATMENT (in code) _____

ONCOLOGY case: Old case / New case **Stage:** Recurrent / Unstaged / Stage I / Stage II / Stage III / Stage IV

For specimen removal requiring morcellation in laparoscopic surgery

Specimen: Uterus (± appendages) / Fibroids / Adenomyoma / Ovarian tumour / Others _____

Malignancy: No / Unsure / Suspicious / Yes **Morcellation method:** LapKnife / Manual / Power

Portal of morcellation: Umbilicus / Lateral port site / Suprapubic / Vagina / _____

Use of containment system: No / Yes **Bag integrity:** Not relevant / Intact / Punctured / Broken

Type of bag: MorSafe / Metrabag / ECO-T / Alexis Containment System / LaparoSurg EndoPouch / Others _____

_____ **Pathology:** Benign / Borderline / Malignant / Uncertain

Complication/Remark: _____

COMPLICATIONS (circle as appropriate)

Intra-operative/procedural

- 1. Bladder injury
- 2. Ureteric injury
- 3. Bowel injury
- 4. Perforation of uterus
- 5. Major vascular injury
- 6. Inferior epigastric artery injury
- 7. Surgical emphysema
- 8. Fluid overload
- 9. Haemorrhage requiring transfusion
- 10. Cardiopulmonary arrest
- 11. Anaesthetic complications (Specify):

- 12. Others (Specify): _____

- 13. Conversion to laparotomy

Post-operative/procedural

- 1. Fever >38°C after first 24 hours (readings at least 4 hours apart)
- 2. Bowel injury/ fistula
- 3. Bladder injury/ fistula
- 4. Ureteric injury/ fistula
- 5. Chest infection
- 6. Urinary tract infection (requiring antibiotics)
- 7. Wound complications (Dehiscence, haematoma, ecchymosis)
- 8. Pelvic hematoma/abscess
- 9. Postoperative haemorrhage requiring re-operation or transfusion
- 10. Deep vein thrombosis
- 11. Pulmonary embolism
- 12. Cardiopulmonary arrest
- 13. Cerebro-vascular accident
- 14. Unplanned re-operation before discharge (specify): _____
- 15. Re-admission within 28 days of surgery (specify): _____

14. Death (Specify):

16. Others(specify): _____
